Test Method Development

Research Committees

Volunteer committee members develop and maintain the AATCC Test Methods published in the *AATCC Manual of International Test Methods and Procedures*. Committee members work together to identify and propose new industry methods. Diverse perspectives are valued and every voice is important. New test method proposals, as well as revisions and reaffirmations of existing methods are voted on by committee members. Every vote counts and only AATCC Members can vote on committees.

Most communication and balloting is electronic, so you can participate, vote, and attend meetings from anywhere.
